

SQL Analysis Report

Objective

Analyze the Sample Superstore dataset using SQLite queries.

Tools Used

Python, SQLite, Pandas, Jupyter Notebook.

Dataset

Superstore_Cleaned.csv imported into SQLite as 'superstore'.

SQL Concepts

SELECT, WHERE, ORDER BY, GROUP BY, HAVING, Aggregate Functions, JOINS, Subqueries, CTEs, Window Functions.

Key Insights

1. Technology generated the highest sales.
2. Office Supplies had the most orders.
3. High discounts reduced profit.
4. West region showed strong sales.
5. SQL made business analysis efficient.

Conclusion

The SQL analysis successfully extracted meaningful business insights and strengthened practical SQL skills.
